

Budget 2024-25

This information is accurate as of 14 May 2024.

Digital ID

This measure will provide \$57.4 million in 2024–25 and 2025–26 for Services Australia to continue to contribute to achieving the government's vision for Digital ID.

In particular, the measure will allow:

- the continuation of Services Australia's Digital ID system administrator role, including ongoing delivery of the Oversight Authority Response System
- ongoing funding for delivery of the Digital ID Exchange.

This will ensure the Digital ID system maintains its compliance with the emerging Digital ID legislation.

This measure will also allow for a proof of concept to be developed to enable government-issued verifiable credentials to be added to digital wallets. The proof of concept will then inform pilot programs using verifiable credentials in digital wallets.

The measure is led by Treasury.

This measure is subject to passage of legislation.

Who this measure affects

This affects customers that have or want to create a Digital ID.

When this starts and finishes

This measure starts on 1 July 2024 and end on 30 June 2026.
